

Safeguarding Analysis and Assessment (SAAF) Training

(Child & Family Training Ltd)

This **2 day** training is aimed at all **safeguarding leads, practitioners** and their **managers** from the BSCB partner agencies who are involved on an interagency basis in **safeguarding assessments and decision making** e.g. core groups, case conferences, in particular those who have responsibility for making or contributing to assessments of risk and need, and evaluation of parenting capacity, in safeguarding contexts. The framework complements the **Signs of Safety** approach and there will be opportunities during the course to consider how they work well together.

Please note - due to funding and the in-depth nature of the course we are unable to accept students onto this course.

Course Aim

- To train participants in the use of the *Safeguarding Assessment and Analysis Framework (SAAF)* which provides a systematic, robust, evidence-based and time-efficient model.
- The *SAAF* applies and develops the use of the Assessment Framework specifically for the safeguarding context and builds up skills and good practice in compiling and structuring assessments and reports for the courts in **complex safeguarding cases**
- The assessment tool can be used alongside the Signs of Safety model and this is flagged up at appropriate points in the training
