

Safeguarding Presentations

Confidentiality - Recording and social media

The safeguarding partnerships in Bradford are keen to share learning and assist with the development of a range of learners.

The nature of the subjects that are covered will often include confidential and sensitive material especially when reviewing cases of serious harm and tragic death.

With this in mind it is important that the information shared to enhance learning is treated with respect.

Therefore it is not appropriate to record or take photographs during the session and or share the material / content via social media sites.

You must adhere to this confidentiality requirement as a condition of your attendance at this session.
